

Kiina:

Dear Madam / Sir,

I thank the Chinese government for closing bear farms and releasing 500 bears into the care of Animals Asia. I'm asking you to continue to promote the herbal alternatives to bear bile used in Chinese medicine.

The agreement between the Animals Asia Foundation and the Government departments of the China Wildlife Conservation Association and the Sichuan Forestry Department for the rescue of 500 endangered Moon Bears is a significant step in addressing the issue of bear farming and welfare of suffering bears.

I hope you will continue in the path of ending bear farming in China . We hope you will end bear farming in China as soon as possible, and encourage you to do so before the Beijing Olympics 2008.
